oemus.AI

Content becomes knowledge.

OEMUS.AI

AI-powered dental research for a global audience

Users ask specific questions about dental topics and receive clear, accessible answers. Links to the underlying sources enable further research. OEMUS.AI combines content from the media platforms of **OEMUS MEDIA and Dental Tribune International** with additional authoritative professional sources. Partners can also contribute their existing expertise, making it accessible through AI-powered research.

Question → Search → Answer → Sources

A global portal—integrated into the international media network of OEMUS MEDIA, Dental Tribune International and participating partners.

Special rates available now!

Your expertise. Available when questions arise.

OEMUS.AI is a globally accessible platform for AI-powered dental research.
Users can explore technologies, procedures, products, applications and scientific topics.
As a partner, you can make your existing expertise available within this professional research environment.

Get more out of existing content

Studies, professional articles, brochures, product information and website content become accessible through an additional digital research channel.

From the answer straight to the source

OEMUS.AI links to the underlying information sources. Users can access the original sources to explore the information in greater depth.

Gain visibility in a relevant professional context

Users do not always search for a specific brand or organisation. Integrated content can be taken into account when users ask relevant professional questions.

National or international content presence

The International Package enables partners to integrate relevant content from multiple countries and markets into the OEMUS.AI knowledge base.

A global portal. A shared knowledge base.

Flexible content integration options.

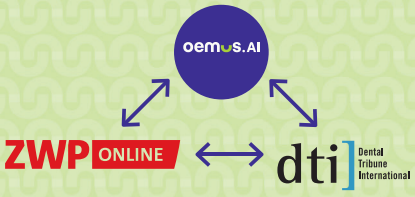
Where does the knowledge come from?

One knowledge base. Multiple professional sources.

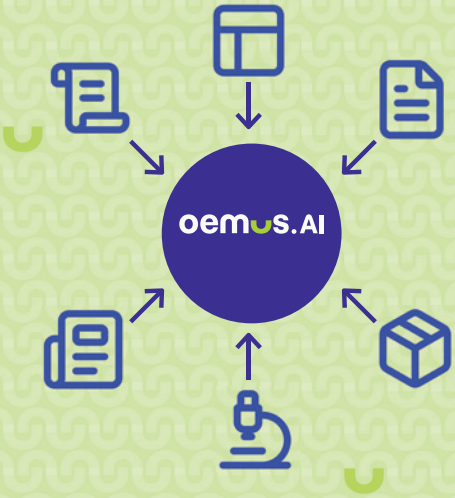
OEMUS.AI brings together relevant dental expertise from a range of sources and makes it available through a single global research platform.

1. OEMUS MEDIA & Dental Tribune International
Professional and editorial content from national and international media outlets forms a core part of the knowledge base.



2. Knowledge from our partners
Companies, professional associations, publishers, scientific institutions and other organisations contribute their own relevant content.
The **AI Partner Content Package** makes existing company knowledge accessible through OEMUS.AI. This process can incorporate various digital content sources from a company.

Partner content may include:



Websites and professional portals
Relevant publicly available content

Studies and scientific content
Publications, white papers, guidelines and clinical information

Professional media and editorial content
Professional articles, interviews, expert contributions and clinical case reports.

Product and application knowledge
Product information, brochures, technical documentation and instructions for use or application guidance.

Existing knowledge. New ways to access it.

OEMUS.AI does not require the creation of new content. Existing digital content can be made accessible through an additional research channel. **The national or international content sources included depend on the package selected.**

Become an OEMUS.AI content partner.

One global portal. Two integration models.

OEMUS.AI is accessible worldwide regardless of the package selected. The National and International packages differ in the scope of partner content integrated into the knowledge base—specifically, which websites, platforms and other content sources are included.

National

AI Partner Content Package

Focus on a national market
The partner's agreed national websites and content offerings are integrated.

The package includes:

- **National website integration**
  Integration of the agreed national website or content sources.
- **Additional national content**
  Integration of relevant PDFs, studies, professional articles, product information and other content specific to the respective market.
- **Links to original sources**
- **Up to four consolidated content updates per year**

€2,950/year
Regular price effective 1 January 2028: €4,950/year

International

International AI Partner Content Package

The partner's agreed websites and content sources are integrated, making professional, product and company knowledge from different countries and markets available within the shared OEMUS.AI knowledge base.

The package includes:

- **Comprehensive website integration**
  Integration of relevant websites and content sources from the agreed markets.
- **International content integration**
  Inclusion of PDFs, studies, technical articles, product information and other relevant content across multiple countries.
- **Links to original sources**
- **Up to four consolidated content updates per year**

€5,900/year
Regular price effective 1 January 2028: €9,900/year

Your expertise already exists. Make it available worldwide through a new research channel. Become an OEMUS.AI content partner today.

OEMUS.AI is accessible worldwide. The package determines the scope of the integrated partner content.
