

THE SUBCRESTAL IMPLANT SYSTEM
FOR BIOLOGICAL LONG-TERM STABILITY

NO CHANCE FOR BACTERIAL INTRUDERS!

The form- and force-fit morse tapered Implant-Abutment connection avoids any gap formation but seals the cavity permanently

SUSTAINABLE
TISSUE PRESERVATION!

The K3Pro Implant is free from micro-movements and guarantees long-term stability of the peri-implant hard and soft tissue

MEDIUM-TERM
TISSUE LOSS!

Standard implant with platform switch without morse tapered connection

K3PRO – IMPLANTS FOR EVERY INDICATION
