Zeramex XT

The two-piece screw-retained ceramic implant system

Experts with **17 years experience** in ceramic implants

Get to know the proven Zeramex XT ceramic implant system with the metal-free Vicarbo® screw that counteracts tensile and bending forces.

Convincing osseointegration, excellent red-white aesthetics, low plaque affinity, no material-related inflammatory reactions, optimal for conventional & digital workflow.

Made in Switzerland – since 2005
