German S3 guidelines:

<https://pubmed.ncbi.nlm.nih.gov/36190587/>

FULL RECOMMENDATION: **One-piece** zirconia implants are a valid and ready-to-use therapeutic procedure and **can be used** as an alternative treatment option.

All SDS implant shapes, including the two-piece 2.1 and 2.2, fall into the ONE-PIECE category, as the abutment is fixed **in** the implant and the crown is fixed **on** the implant.

A cost-effective ceramic implant combined with the experience and safety of the world market leader? As the world market leader for ceramic implants, we have developed and launched a ceramic implant which is delivered including the post „2-in-1“ and, in addition, can be used either as a two-phase unloaded implant or as a one-piece implant for immediate restoration through immediate cementation of the

post supplied. Ceramic implantology has never been easier or more cost-effective, and with a complete price of €395, the VALU€ implant should not only be more affordable than its ceramic competitors, but also than many premium titanium implants.* Visit the free online course “2.1 Fast Lane Certification Course” today and start safely into the future of ceramic implantology!
