

DENTATUS: QUALITY SOLUTIONS FOR DENTISTRY AND THE WORLD

■ Founded in 1930, Dentatus has been developing, manufacturing and supplying unique dental solutions for over 95 years. Since its inception, the company has pioneered numerous groundbreaking products, including precision articulators introduced in 1944 and the first prefabricated classic metal post, which has become an industry standard.

Profin is clinicians' system of choice. Profin consists of contra-angle handpieces and Lamineer diamond-coated tips. The handpieces move in an axial direction with reciprocating motion (1.2 mm stroke). Thanks to their thin design, the tips provide optimal access to areas that are difficult to reach, and the one-sided diamond coating promotes safety and control.

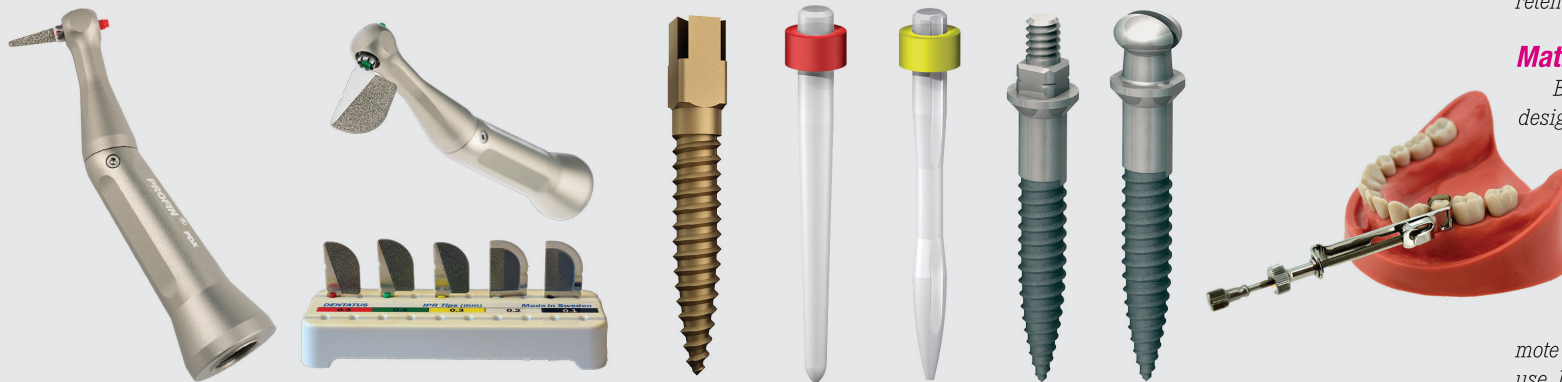

ance and delivering predictable, successful treatment results consistently. The IPR tips are calibrated for the amount of reduction, enabling precise results without the use of an additional gauge. The tips are colour-coded by tip thickness and are double-sided for maximum efficiency.

The Complete IPR Solution is compatible with all aligner systems and

ups. These high-quality prefabricated metal posts are both dependable and economical.

Luscent anchors—the original translucent posts—are made of unidirectional fibreglass rods encapsulated in a strong resin matrix. They enable aesthetic, long-lasting restorations and feature excellent strength characteristics.

The Atlas implant has been designed for long-term use to retain and stabilise dentures. Eliminating the hardware typically associated with overdentures, the Atlas system uses no O-rings, housings or adhesives. Instead, the unique Tuf-Link silicone relining material is mechanically secured within the denture by an undercut and provides a cushioned fit for stress-free denture insertion, retention and removal.

• From left: Profin reciprocating system, Complete IPR Solution (Profin PDX contra-angle handpiece with the IPR tips kit), gold Surtex Classic post, Luscent anchors, Dentatus Anew narrow-body implant, Atlas implant and matrix system.

Dentatus believes that true quality means creating solutions that are good not only for dentistry but also for the environment. At the heart of Dentatus is a commitment to providing sustainable, high-quality products without compromise.

Profin reciprocating system

For shaping, contouring and polishing natural dentition and cosmetic restorations with ease and flexibility,

The Lamineer tips are available in a variety of shapes, sizes and grits, making Profin perfect for everything from routine hygiene and periodontal care to orthodontics, cosmetic dentistry and CAD/CAM restorations.

In 2022, Dentatus introduced the Complete IPR Solution for quick and efficient interproximal reduction (IPR) procedures, saving time, improving patient comfort, reducing clinician stress, ensuring treatment compli-

was launched in anticipation of the growth of the global clear aligner market. This is also reflected in Dentatus's special offer at IDS: Profin PDX contra-angle handpiece with IPR tips starter kit at a reduced cost of €237.34 (SRP).

Post systems

Surtex Classic posts are the global standard for post systems, offering dentists consistently reliable solutions for post and core build-

Implant systems

The Dentatus Anew narrow-body implant is the best treatment option for patients lacking time, money or sufficient bone structure. It is the only narrow-body implant with a screw-retained prosthetic system. It has received U.S. Food and Drug Administration clearance for long-term use, has been validated for permanent use and is supported by over 20 years of clinical research.

Matrix system

Based on the inventor's original design, Nyström matrix retainers and Dentatus matrix bands offer dentists a complete system for everyday reliability. Nyström retainers can be applied lingually or buccally for firm adaptation of the matrix band to the tooth and promote secure retention and ease of use. Dentatus matrix bands are manufactured from the highest-quality stainless steel and have perfectly smooth edges. The company's special series Class V matrix bands are especially useful in recreating gingival margins of Class V restorations.

PLANMECA BRINGT VOLLSTÄNDIG DIGITALE WORKFLOWS AUF DIE IDS 2023 PLANMECA BRINGS ALL-DIGITAL WORKFLOWS TO IDS 2023

■ Planmeca ist auch in diesem Jahr auf der IDS mit einem Stand vor Ort und präsentiert dort ein breites Spektrum von digitalen Innovationen und Produktneuheiten. Am Messestand werden Besucherinnen und Besucher die einzigartigen Vorteile der vollständig digitalen Arbeitsabläufe von Planmeca in Live-Demonstrationen kennenlernen und die neuesten Ergänzungen zum Planmeca-Produktportfolio entdecken.

Für Planmeca ist die IDS immer ein Highlight im Veranstaltungskalender. Sie bietet die Möglichkeit, mit zahnärztlichem Fachpersonal und Partnern zu interagieren, Ideen auszutauschen, neue Produkte einzuführen und die Vorteile von Planmeca-Lösungen in Live-Präsentationen zu demonstrieren.

Auf der IDS 2023 wird Planmeca sein komplettes Portfolio präsentieren. Zu den Highlights gehören neue Produkteinführungen in allen Hauptproduktkategorien - Behandlungseinheiten, Bildgebung, CAD/CAM und Software. Darüber hinaus haben Besucherinnen und Besucher am Firmenstand die Möglichkeit, HeySmile, das von Planmeca kürzlich eingeführte System für transparente Aligner-Schienen, zu entdecken.

In praktischen Produktdemonstrationen erfahren Besucherinnen und Besucher, wie die volldigitalen Workflows von Planmeca dem zahnärztlichen Fachpersonal dabei helfen, die tägliche Arbeit zu optimieren, die Kundenerfahrung zu verbessern und jedes Mal vorhersagbare und präzise Behandlungsergebnisse zu erzielen.

Im Mittelpunkt jedes Arbeitsablaufs steht die einzigartige All-in-one-Softwareplattform

Planmeca Romexis, die eine umfangreiche Auswahl an benutzerfreundlichen Werkzeugen und Funktionen zur Bilderfassung, Diagnose und Behandlungsplanung für alle Fachgebiete und Anforderungen bietet. Der Stand von Planmeca umfasst auch dedizierte Bereiche für Lösungen, die speziell für die Bedürfnisse von großen Gemeinschaftspraxen, zahnmedizinischen Fakultäten und Dentallaboren geeignet sind.

„Nach den letzten Jahren, die von der COVID-19-Pandemie betroffen waren, freuen wir uns sehr auf die IDS 2023. Auch wenn wir neue Wege gefunden haben, mit unseren Kunden und Partnern aus der Ferne zu kommunizieren, gibt es nichts Besseres als die Energie der IDS und den persönlichen Austausch mit Zahnärztinnen und Zahnärzten. Wir freuen uns schon auf anregende Gespräche an unserem Stand und die Chance, die intelligenten Eigenschaften unserer Produkte zu präsentieren“, sagte Jouko Nykänen, Senior Vice President bei Planmeca.

In diesem Jahr präsentiert Planmeca sein Produktportfolio an einem brandneuen Standort in Halle 1, direkt neben dem Eingang zu Halle 5. Der Stand grenzt an den von KaVo Dental, das seit letztem Jahr Teil der Planmeca-Gruppe ist. ◀

■ Planmeca is excited to present a vast range of digital innovations and new products at the 2023 IDS. At the Planmeca booth, visitors can expect to learn the unique benefits of Planmeca's all-digital workflows in live demonstrations and discover the latest additions to the Planmeca product portfolio.

For Planmeca, IDS is always a highlight in the company's event calendar, offering a chance to interact and exchange ideas with dental professionals and partners as well as launch new products and illustrate the benefits of Planmeca solutions in live hands-on demonstrations.

At IDS 2023, Planmeca is showcasing its complete portfolio. Highlights include new product launches in all main product categories: dental units, imaging, CAD/CAM and software. Additionally, visitors to the Planmeca booth have the opportunity to discover HeySmile, the recently launched clear aligner solution powered by Planmeca Group.

In hands-on product demonstrations, visitors will learn how Planmeca all-digital workflows help dental professionals optimise their daily work, improve the patient experience, and achieve predictable and precise treatment results every time. At the centre of each workflow is the unique Planmeca Romexis all-in-one software platform, which includes a rich selection of easy-to-use tools and features for all needs and specialties, from dental imaging to diagnosis and treatment planning. The Planmeca booth also includes dedicated areas for solutions specifically designed for the needs of large group practices, dental schools and dental laboratories.

“After a couple of years affected by the COVID-19 pandemic, we are truly looking forward to IDS 2023. Although we have found new ways to communicate with our customers and partners remotely, nothing beats the energy of IDS and networking with dental profession-

als in person. We can't wait for inspiring discussions and demonstrating the intelligent features of our products at our booth at IDS 2023,” said Jouko Nykänen, senior vice president at Planmeca.

This year, Planmeca is presenting its product portfolio in a brand-new location in Hall 1, right next to the entrance to Hall 5. Its booth adjoins that of KaVo Dental, which became part of Planmeca Group last year. ◀
