

Did you ever know...

...that for many years BDIZ EDI

and its partner associations from Europe and beyond, as well as other associations from all over the world, meet once a year to exchange ideas? Mainly at the Expert Symposium in Cologne, the latest in oral implantology news from the different countries is discussed and strategies are developed to promote the discipline.

...that the BDIZ EDI

closely follows the Council of European Dentists (CED), which represents the dental associations of all EU member states, through its professional journals *BDIZ EDI konkret* and *EDI Journal*? The work, aims and results of the Brussels-based umbrella organisation of European dentists are regularly presented here.

...that the BDIZ EDI

makes the modules of its implantology curricula available to its European partner associations so that they can develop their own country-specific curricula? This has already been done in Poland, in Serbia and in Greece.

Our Munich office will be happy to tell you more:
