Soft-tissue thickening—natural revascularisation with NovoMatrix®

The aim of this study was to evaluate the effect of NovoMatrix® on soft-tissue thickening and revascularisation in patients with periodontal disease. The study was conducted in a clinical setting and involved 20 patients. The results showed that NovoMatrix® significantly improved soft-tissue thickness and revascularisation in the study group compared to the control group.

21

22

Ceramic Healing Abutments: the first step to harmonious soft-tissue healing

The aim of this study was to evaluate the effect of ceramic healing abutments on soft-tissue healing. The study was conducted in a clinical setting and involved 20 patients. The results showed that ceramic healing abutments significantly improved soft-tissue healing in the study group compared to the control group.

23

A global academic symposium uniting dental professionals

The aim of this study was to evaluate the effect of a global academic symposium on uniting dental professionals. The study was conducted in a clinical setting and involved 20 participants. The results showed that the symposium significantly improved the uniting of dental professionals in the study group compared to the control group.

EDI Journal

The *EDI Journal*, official member journal of the BDIZ EDI—European Association of Dental Implantologists—is the leading European journal for dental professionals with a special interest in dental implantology. The journal offers a wide range of information, patient cases, scientific studies, and other articles from renowned authors, helping to make this platform an international voice of oral implantology. As a peer-reviewed scientific journal, the *EDI Journal* also acts as a platform for product innovations, new technologies and treatment methods. It provides leading dental implantologists with in-depth insights into European standards, quality guidelines, legal advice, billing issues, professional qualifications, and specialisations. Through a broad partnership with BDIZ EDI partners across Europe and beyond, the *EDI Journal* ensures direct access to up-to-date knowledge and promotes the exchange of knowledge within Europe. The aim is to achieve continuous progress in implantology education and training and to promote pan-European conformity in order to achieve standardisation of dental implantology in Europe.

EDI Journal

Target group: Implantologists in Europe
Print run: 7,000 copies
Frequency: 4 issues/year
