Geistlich collagen portfolio receives EU MDR certification

Geistlich is one of the first companies in the field of regenerative dentistry to receive MDR certification for its collagen product range. This includes the entire product lines of Geistlich Bio-Gide®, Geistlich Fibro-Gide® and Geistlich Mucograft®. The Swiss company is taking a pioneering role in their field with the approval of these products for bone- and soft-tissue regeneration.

Geistlich has received MDR (Medical Device Regulation) certification from TÜV SÜD Product Service GmbH for its established product lines of Geistlich Bio-Gide®, Geistlich Fibro-Gide® and Geistlich Mucograft®, fulfilling the new EU regulations.

Despite the increased and more demanding quality and evidence requirements of the MDR, all indications for these products, which include a variety of regenerative procedures, have been confirmed. Doctors can therefore rely on a complete range of collagen products that meet their high standards of quality and therapeutic safety.

Pioneer in medical regeneration, extended range of indications

Geistlich Fibro-Gide® is the first non-active class III medical device of animal origin to be certified according to MDR by TÜV SÜD Product Service GmbH. The MDR certification for Geistlich Mucograft®, which is now also approved for indications outside the mouth in the facial area, is particularly pleasing.

Commitment to the highest quality standards and patient safety

Diego Gabathuler, CEO, says: "With the MDR certification, long before the official transition period ends, we underline our commitment to the highest quality standards and patient safety, which

we share together with doctors." With its four subsidiaries and numerous sales partners in Europe, Geistlich has been committed to the well-being of patients on the continent for decades and is driving medical regeneration forward.

Straumann

Revolutionise your full-arch solutions with LOCATOR FIXED® for Straumann® implants

If you're seeking an affordable, reliable fixed full-arch solution, it's time to consider LOCATOR FIXED®.

The LOCATOR FIXED® system leverages the same abutment and workflow as the renowned LOCATOR® Removable Attachment System, making the transition seamless. This revolutionary full-arch treatment ensures a truly fixed prosthesis, enhancing both function and aesthetics for your patients. With its high-retention housing, the system provides a strong bond and reduces chair time, offering efficiency and flexibility in your practice.

Dental professionals praise LOCATOR FIXED® for its simplicity and effectiveness, which translates to lower costs and improved patient satisfaction. Additionally, comprehensive online training is available for free to ensure you and your team can fully capitalise on the system's benefits.

Upgrade your practice with LOCATOR FIXED® and experience the next level of dental restoration.
