

PERI-IMPLANTITIS TREATMENT

STRAUMANN®

GALVOSURGE®

Biofilm removal and implant surface decontamination in 2 minutes.

- Reliably removes biofilm from implant surface.^{1,2,3}
- Cleaning takes only 2 minutes.
- Creates optimal conditions for subsequent regenerative procedures.^{1,2,4,5,6}

Straumann recommends the use of Straumann® biomaterials for reconstructive procedure after implant surface decontamination:

- Jason® membrane—Porcine pericardium mebrane
- cerabone® plus—Sticky bone out of the blister
- maxgraft® granules—Processed allograft
