**New BDIZ EDI implant pass** 

## Bigger, nicer, more useful

The BDIZ EDI has updated its implant pass. Now was a good time, coincident with the launch of the updated BDIZ EDI logo. The size of the implant pass has not changed—it still fits in any wallet. But thanks to a clever folding technique, it now covers a lot more ground.

The small implant pass has been with the BDIZ EDI for more than 30 years. As part of the relaunch of the association's logo and corporate identity, it has been completely renewed and adapted to the current needs of the implantology practice.

Its physical size has remained the same. When folded, the implant pass still matches the size of the standard checkbook for routine dental visits. Discreet on the outside, informative and expandable on the inside. The implant pass can be individually expanded with stickers to accommodate a greater number of implants and restorations. In addition to the patient's details and the practice seal, the following information is provided for the patient to sign: "I have decided to have dental treatment with implants. I have been fully informed of the risks and benefits prior to the treatment. I understand that intensive oral hygiene and regular checkups are necessary for long-term success. I agree to have at least two dental checkups per year and will contact my dentist immediately if I notice even the slightest change in or around the implants." are open to demand the risks and benefits below have informed in detail about the risks and benefits below starting treatment. I know that intensive oral hypere and starting treatment. I know that intensive oral hypere a suggier check-ups are necessary for long-term success. I commit to a least two dential examinations per year and with intendiable contact my practitioner at the significachonget in the area of the implants.

"The new implant pass contains a lot of important information and is a useful tool for surgeons, prosthodontists and, of course, patients," says Dr Wolfgang Neumann, BDIZ EDI Treasurer and board

member. Together with Christian Berger,

he contributed his dental expertise to the creation of the new implant pass.

## Details and ordering information
