

Small changes, big smiles

Minimally invasive restorations for maximum aesthetic impact

About one fourth of people are unhappy with their smile, which has a considerable psychosocial impact. Many could benefit from subtle, minimally invasive changes to their teeth that ultimately greatly improve the overall smile aesthetics. **G-ænial A'CHORD** and **G-ænial Universal Injectable** are the excellent partners herein. With remarkable shade matching, gloss and viscosities for each preferences and indications, even the highest aesthetic demands can be fulfilled.
