Where science meets practice

The 3rd European Congress for Ceramic Implant Dentistry 2025 sets a new benchmark in Zurich

From 25 to 27 September, Zurich will become the international hub of ceramic implantology as the European Society for Ceramic Implantology (ESCI) will host the 3rd European Congress for Ceramic Implant Dentistry. This premier event brings together scientific excellence, clinically relevant education, and elite networking in a single, world-class forum. Dental professionals, implantologists, and researchers from across Europe and beyond are invited to experience a dynamic and forward-thinking congress rich in innovation, interdisciplinary exchange, and clinical mastery.

Three days of high-level knowledge exchange

The ESCI Congress presents a robust scientific programme featuring 25 internationally renowned speakers, each delivering cutting-edge insights into the latest research, time-tested clinical strategies, and emerging treatment paradigms. Whether you're seeking to deepen foundational knowledge or explore advanced interdisciplinary approaches, the congress offers a compelling blend of academic rigor and practical application.

A variety of lectures, case presentations, and workshops will equip participants with actionable knowledge for everyday clinical practice. A key highlight: hands-on training sessions led by global experts, where attendees can refine their skills in surgical techniques and the integration of ceramic implants in aesthetic and functional dentistry.

Live surgeries, expert training, and hands-on learning

The congress opens on September 25 with a comprehensive full-day pre-congress workshop, hosted in collaboration with the Center for Dental Medicine at the University of Zurich (ZZM). This exclusive programme offers a unique clinical experience, featuring three live surgeries performed by renowned experts: Prof. Dr Ronald Jung, Dr Marc Balmer, and Dr Jens Tartsch.

The focus will be on three state-of-the-art ceramic implant systems—Straumann PURE Ceramic, NobelPearl, and the CERALOG PROGRESSIVE-LINE. Combining theoretical foundations with hands-on practice, this workshop delivers in-depth insights into contemporary ceramic implant protocols for both beginners and seasoned clinicians. With a limited group of just 20–40 participants, this immersive format ensures personalised instruction and meaningful interaction.

Elevated networking in an exclusive setting

Beyond its educational value, the congress also serves as a distinguished networking location. Attendees will enjoy a welcome reception and an elegant gala dinner at one of Zurich's exclusive venues—ideal opportunities to engage in meaningful dialogue with colleagues, speakers, and thought leaders in a relaxed, sophisticated atmosphere. All of this set against the backdrop of Zurich—a city celebrated for its commitment to excellence, cultural richness, and warm hospitality.

A Swiss metropolis where innovation meets precision

As the host city, Zurich perfectly embodies the spirit of the congress: a global hub of scientific innovation, Swiss precision, and world-class quality. Situated in the historic old town and near the University of Zurich, the venue offers a unique blend of academic vibrancy and serene charm—providing the ideal environment for professional growth and international exchange.

Redefining the future of ceramic implantology

With its ambitious scientific agenda, hands-on training opportunities, and refined social programme, the 3rd European Congress for Ceramic Implant Dentistry 2025 is far more than a continuing education event. It is a defining moment in the evolution of ceramic implantology—shaping the future of the field across Europe and beyond.
