

Tailored Solutions for Every Case

OSSTEM IMPLANT

Smart Choices in Regeneration

OssBuilder

Preformed pure titanium membrane – shape, fix, and regenerate with precision.

A-Oss:

Xenograft with natural bone structure for excellent volume stability and predictable integration.

Q-Oss+

Fully synthetic alloplast with optimized porosity – ideal for patients preferring non-animal products.

OssMem (Soft / Hard)

Resorbable bovine pericardium membrane – strong yet flexible for reliable GBR results.

OssCover

Resorbable porcine collagen membrane with excellent handling and barrier function.
