straumann

PERI-IMPLANTITIS TREATMENT

STRAUMANN®
GALVOSURGE®

Biofilm removal and implant surface decontamination in 2 minutes.

- → Reliably removes biofilm from implant surface.[1,2,3]
- → Cleaning takes only 2 minutes.
- → Creates optimal conditions for subsequent regenerative procedures. [1,2,4,5,6]

Straumann recommends the use of Straumann® biomaterials for reconstructive procedure after implant surface decontamination:

- → Jason® membrane – Porcine pericardium mebrane
- → cerabone® plus – Sticky bone out of the blister
- → maxgraft® granules – Processed allograft
