

Mini LED AutoFocus

Attractive, powerful and clever

- The AutoFocus function calculates automatically the necessary illumination time to polymerize most of the composites on 2 mm.
- A laser target ring helps to visualise and to control light projection to the site of maximum lamp power.
- Power of 2 200mW/cm² ± 10% with the light guide ø7.5 mm and 3 300mW/cm² with the ø5.5 mm.
- 4 modes adapted to the main clinical procedures.

- Using RISKONTROL air/water syringe tips protects practitioners and their patients against risks of direct or cross-contamination.
- These flexible, bendable, single-use tips without shape memory are practical, quick to fit and remove. It is no longer necessary to clean, decontaminate and sterilise the original tip of your air/water syringe.
