

INNOVATIONS 2011, the future now with Acteon

SOPROLIFE

Light Induced Fluorescence Evaluator

The Blue revolution

- Patented SOPRO innovation in fluorescence technology
- SOPROLIFE makes it possible to see the invisible by detecting decay at different stages of development
- SOPROLIFE offers more accuracy in locating and evaluating a decayed lesion with a magnification of 30 to 100 times the image
- Guides and speeds up the choice of treatment protocol
- Used in conjunction with Sopro Imaging, you obtain a dedicated module that allows you to have a personalized follow-up of your patients
