

VarioSurg

Non Stop Evolution

Power, Safety & Accuracy, No compromise

NSK Research & Development is a continuous evolution and materialization of ideas driven by professionals' feedback, new treatment procedures and new production technology. VarioSurg, with LED illumination, is a fine example of the momentum achieved by NSK R&D. The latest VarioSurg system has been upgraded to further improve the ease of clinical application and integrated technology to deliver even safer minimally invasive treatment.

- Superior reserve power enhances applications and reduces treatment time
- Slim, ergonomic handpiece, with LED illumination, allows stable fractional hand movements and clear visibility
- Power feedback & auto tuning functions deliver consistent high efficiency cutting
- The power "Burst" function generates a hammer effect, when required, at the touch of a button
- Avoids damage to soft tissue even during accidental contact
