

RAYPEX 6— State-of-the-art technology

For the precise location of the apical constriction, electronic means have been proven to be superior to using radiographs. RAYPEX devices ensure precise measurement and feature a unique zoom-in function, which significantly aids endodontic treatment. The latest model, RAYPEX 6, redefines user-friendliness and design standards.

Its design, operation and user-friendliness were developed to a high standard, resulting in a stylish and handy casing, which can be folded flat when not in use. The high-resolution touch-screen with a self-explanatory user-interface is comparable with a smartphone, and the menu guidance was designed to ensure precise and fast navigation through the functions.

For precise length determination, RAYPEX 6 uses the latest multi-frequency technology. The 3-D graphic display constantly indicates the position of the tip of the file, while the automatic zoom-in function in the region of the apical constriction enhances safety in

the critical section just before reaching the working length. Acoustic signals allow for a "blind" localisation of the apex.

RAYPEX 6 is ready for use—simply plug-in and start. Any personalisation of display colour and tones, for instance, can be done quickly.

RAYPEX 6 means precise length determination and touch-screen convenience.
