Cordless
with an extra-small head

120 Years W&H.
Help us support SOS Children's Villages!

An extra-small head. No cord. And full power. The Entran cordless handpiece provides complete freedom of movement and, thanks to its extra-small head, also gives optimum access to the treatment site. The torque-controlled automatic direction change and the five torque levels set new safety standards in cordless endodontics.

People have Priority! W&H supports the humanitarian organization SOS Children's Villages. Get involved! Further information at wh.com
