## Copyright Regulations

\_roots international magazine of endodontology is published by Oemus Media AG and will appear in 2011 with one issue every quarter. The magazine and all articles and illustrations therein are protected by copyright. Any utilisation without the prior consent of editor and publisher is inadmissible and liable to prosecution. This applies in particular to duplicate copies, translations, microfilms, and storage and processing in electronic systems.

Reproductions, including extracts, may only be made with the permission of the publisher. Given no statement to the contrary, any submissions to the editorial department are understood to be in agreement with a full or partial publishing of said submission. The editorial department reserves the right to check all submitted articles for formal errors and factual authority, and to make amendments if necessary. No responsibility shall be taken for unsolicited books and manuscripts. Articles bearing symbols other than that of the editorial department, or which are distinguished by the name of the author, represent the opinion of the afore-mentioned, and do not have to comply with the views of Oemus Media AG. Responsibility for such articles shall be borne by the author. Responsibility for advertisements and other specially labeled items shall not be borne by the editorial department. Likewise, no responsibility shall be assumed for information published about associations, companies and commercial markets. All cases of consequential liability arising from inaccurate or faulty representation are excluded. General terms and conditions apply, legal venue is Leipzig, Germany.

# MAP SYSTEM

## Micro-Apical Placement System

NiTi Memory Shape Nadel

- Niti memory shape needles – flexible, bendable needle
  - can be shaped to any required curvature – perfectly follows the canal anatomy
  - the needle takes its initial straight shape during autoclave sterilization
- The MAP (Micro-Apical Placement) System, provides a unique and efficient method for placing root-canal repair materials:
  - either by orthograde obturation for the treatment of perforations, root-end fillings and pulp-cappings using curved, straight or «memory shape» NiTi needles
  - or by retrograde obturation after apical resection thanks to the specially designed, triple-angled needles (left and right angled) and/or hooked needles
