The universe at your fingertips.

LightWalker®

LightWalker TwinLight™ Treatment Concept

- Dentistry's two best wavelengths in one system: Nd:YAG and Er:YAG
- Optimum use of the unique laser-tissue interaction characteristics of each wavelength
- Nd:YAG is superior for coagulation and deep disinfection
- Er:YAG is uniquely efficient at ablating hard and soft tissues
- Dual wavelength procedures dramatically improve the outcome of treatments
- Maximum safety and efficacy
