## Some things last forever.

### PANAVIA™ POST

The new glass fiber post with excellent mechanical durability – your solution for long-lasting, reliable restorations.

PANAVIA™ POST is a fiber post made of resin reinforced glass fibers with high mechanical durability and an optimal elastic modulus for your reliable restorations. This effect is achieved thanks to Kuraray's unique monomer technology and surface treatment technology.

While other posts will lose their stability inside the post and might break, PANAVIA™ POST stays strong and stable – due to a strong adhesion between the glass fiber and the resin.

#### Your benefits:

- ✓ Excellent mechanical durability of long-term restoration
- ✓ Low risk of debonding and root fracture
- ✓ Esthetic restoration and ideal light-curing property
