Fotona[®]
choose perfection

The universe at your fingertips.

TouchWhite™ Laser Assisted Tooth Whitening

A perfect white smile now faster and safer than ever before

- Utilizing the unique laser tissue interaction of the Er:YAG laser wavelength and Fotona's VSP pulse mode
- Up to 10 times shorter treatment times
- Safer - no unnecessary thermal burden on the tooth or pulp
- More comfortable for patients while achieving the same or better whitening efficacy
- Any bleaching gel color can be used
- Perfect, natural looking results after one single treatment

Available only with
