

Proven stability, high esthetics.

Strong and tight seal with the internal conical connection.

Natural-looking esthetics with built-in platform shifting.

High initial stability with the proven tapered implant body.

OPTION

with 0.75 mm machined collar

NobelReplace Conical Connection combines the original tapered implant body with a sealed conical connection, offering you and your patients an esthetic solution for all indications. The implant body mimics the shape of a natural tooth root, designed for high initial stability with all types of loading protocols including Immediate Function. Developed for restorations in the esthetic region,

NobelReplace Conical Connection offers a strong sealed connection with built-in platform shifting, designed to maximize soft tissue volume for natural looking esthetics. After 45 years as a dental innovator we have the experience to bring you future-proof and reliable technologies for effective patient treatment. **Their smile, your skill, our solutions.**
