

6th International CAMLOG Congress in Krakow

Practice-oriented continuous education

Source: CAMLOG Foundation

The 6th International CAMLOG Congress will take place from June 9 to 11, 2016, in Krakow under the motto "Tackling everyday challenges". Renowned experts from Europe and America will be presenting

current results from their research and clinical experience. A ground-breaking digital dentistry pre-congress on Thursday provides fascinating insights on the entire digital workflow. Experienced specialists

will convey the latest technologies and treatment methods in five—already almost booked out—practical workshops.

Since the first congress in 2006 and the founding of the CAMLOG Foundation, the international CAMLOG congresses have established themselves as important communication and education events in implant dentistry. Top-level speakers, practise-oriented workshops and an attractive location highlight the 6th CAMLOG Congress: the international elite in implant dentistry meets in Europe's award-winning and most modern congress center. The scientific committee, chaired by Prof. Frank Schwarz and Prof. Piotr Majewski, is responsible for the program.

Digital dentistry pre-congress

The influence of digital technologies in both the clinic and the laboratory can no longer be disputed. The full-day symposium illustrates opportunities and options, discusses problematic treatments and gives practical advice. Experienced speakers present an up-to-date, comprehensive interdisciplinary view together with an outlook into the future. An event you should not miss with the added benefit of a combined discount when booking the symposium.

High practical relevance coupled with interaction

The relevance for dental practice has always been a focal point for the CAMLOG Foundation. With this in mind, the speakers have been asked to focus their presentations on the benefits in daily practice. Abstracts of the presentations can be viewed at any time at www.camlogcongress.com. Using an app created specifically for the congress, delegates are given the opportunity of asking the speakers questions. Should

you prefer personal to digital contact, the delegates are available for discussions during the breaks in the Network Lounge.

A visit by Mickey Mouse

One highlight of the congress will no doubt be guest speaker Prof. Markus Gross. He is Director of Disney Research in Zurich and will guide delegates through the digital world of 3-D facial modeling and demonstrate the potential for medical applications. The overview on 20 years of working with digital human faces will certainly be an eye-opener for the audience.

The debate: heated discussions on controversial topics

At the end of the congress, delegates from the panel will be heading for confrontation. Convinced users will be holding an open discussion using concrete examples to underline their position and will answer questions from the audience. Should implants be treated or removed in case of periimplantitis? Is a parallel or conical implant-abutment connection preferable? Discussions you should not miss and where active participation is desired.

Krakow: a UNESCO World Heritage site

A compact historical center with more than 5,000 historic buildings and cultural monuments make Krakow Poland's most beautiful city. The city center features Europe's largest historical market square and also houses an impressive museum and numerous churches. Hundreds of clubs, bars and galleries in the immediate vicinity and the Kazimierz district invite visitors for an evening stroll. Not to forget, of course, the legendary congress party which will be held under the motto "Hard Rock CAMLOG".

All the information on the congress is available at www.camlogcongress.com. Register now. We look forward to welcoming you in Krakow.
