### Copyright Regulations

**implants international magazine of oral implantology** is published by OEMUS MEDIA AG and will appear in 2016 with one issue every quarter. The magazine and all articles and illustrations therein are protected by copyright. Any utilization without the prior consent of editor and publisher is inadmissible and liable to prosecution. This applies in particular to duplicate copies, translations, microfilms, and storage and processing in electronic systems. Reproductions, including extracts, may only be made with the permission of the publisher. Given no statement to the contrary, any submissions to the editorial department are understood to be in agreement with a full or partial publishing of said submission. The editorial department reserves the right to check all submitted articles for formal errors and factual authority, and to make amendments if necessary. No responsibility shall be taken for unsolicited books and manuscripts. Articles bearing symbols other than that of the editorial department, or which are distinguished by the name of the author, represent the opinion of the afore-mentioned, and do not have to comply with the views of OEMUS MEDIA AG. Responsibility for such articles shall be borne by the author. Responsibility for advertisements and other specially labeled items shall not be borne by the editorial department. Likewise, no responsibility shall be assumed for information published about associations, companies and commercial markets. All cases of consequential liability arising from inaccurate or faulty representation are excluded. General terms and conditions apply, legal venue is Leipzig, Germany.

"smart designs  
brave smiles"

**NucleOSS™**  
Dental Implant

T6

Angled screw-abutment mating surface prevents screw loosening. Screw must be tightened to 30 Ncm.

Distinct platform switch

Angled bone condensation platform

Strong side walls

Micro threads

Two angled abutment-implant contact surfaces positioned at different levels.

**1. 20° Angled First Contact Surface:**

Provides even distribution of both lateral and axial forces along the implant body. Furthermore minimizes the abutment micro movement under lateral forces.

**2. 15° Angled First Contact Surface:**

Secondary barrier positioned 2 mm deep within the implant for resisting the forces in case unexpected coronal bone loss. A design feature for additional safety.

Double thread and reverse buttress design allows easier insertion.

Self cutting threads

Reservoir for the bone remnants during insertion

**maxicell®** Surface

# Best in class

## All-on-4<sup>®</sup> treatment concept

The All-on-4<sup>®</sup> treatment concept is the best in its class of solutions. But only when Nobel Biocare products are combined. Many have tried to mirror this groundbreaking concept, but only we have the scientifically documented success to back it up. The All-on-4<sup>®</sup> treatment concept provides edentulous and soon-to-be edentulous patients with a fixed full-arch prosthesis on four implants on the day of surgery. Start treating more patients better.
