Navident

Targeting Perfection

Dynamic navigation for freehanded dental implant placement

See for yourself how freehanded guided surgery aids more accurate implant placement. Navident tracks the drill and the patient's jaw, providing real-time tactile guidance and visual feedback.

"In contrast to surgical guides, Navident provides me with much more information during surgery, which allows me to place implants in a quicker, safer and more enjoyable way."

**Dr. Luigi Vito Stefanelli, DDS
Rome, Italy**

Compatible with any implant type, drill system and all CBCTs currently on the market

- Precision guidance for increased accuracy within 0.5mm of treatment plan*
- Provides even greater value from your CBCT data
- Easy to use, reducing time and expense with a simplified workflow
- Enables minimally invasive flapless drilling without a physical guide

Try Navident's precision guidance for yourself.
