## HIGHLIGHTS

- One and two-piece implants
- Standard:  
Lengths: 9 – 11 – 13 mm  
Diameters: 4.1 – 4.5 – 5.0 mm
- Individual implant designs possible after planning (emergence profile)!
- Patented surface roughening procedure!
- Efficient surgery and prosthodontic restorations (no impression posts, no laboratory analogs, no screwing of implant/abutment)
- No micro-gap
- Only 0.25 % aluminium oxide ( $Al_2O_3$ ) (compared to a ATZ ceramic implant: 25 %  $Al_2O_3$ )
- Scientific studies (including Prof. Becker, University Düsseldorf)
- Content patients thanks to the uncomplicated minimally invasive implantation, MIMI®
- Best price/performance ratio for your success
- 100 % quality Made in Germany
