

Acuris™

It's time to redefine retention.

Click and you're done. That's what the final restoration is like with Acuris—our new conometric concept. Instead of cement and screws, it relies on friction retention to secure the crown onto the abutment. Just click once on the crown with our unique Fixation Tool, and that's it. Placement takes seconds rather than minutes and the procedure couldn't be easier.

Without cement there is less risk of biological complications and without screws there are no visible screw access holes to cover. In short, Acuris is a time-saving and easy-to-use alternative that ensures predictable end-results and excellent esthetics.
