

Azento™
Single tooth replacement

Some call it
convenience,
we call it
Azento.

Visit us at IDS!
Hall 11.2, Booth K-030

Azento makes the most of your valuable time by streamlining your workflow, increasing patient acceptance rates and making your everyday more convenient.

You simply scan your patient and upload the data. We then suggest a customized treatment plan, which you review and approve. After this, you receive a box with everything needed for the treatment, including the plan, surgical guide, instruments and drills, a case-specific implant and an Atlantis custom healing abutment.

With Azento you get an easier workflow —scan, approve, treat.

Outstanding flow. Great results.
Azento by Dentsply Sirona Implants.
