On 10 and 11 May 2019, the 5th Annual Meeting of the International Society of Metal Free Implantology (ISMI) will take place on the premises of the Constance Clinic under the theme "Ceramic Implants—Game Changer in Implantology". Renowned speakers and participants will discuss practical experiences and current trends in the use of ceramic implants on both congress days. With its 5th annual conference, ISMI—founded in January 2014 in Constance, Germany—would like to push boundaries and offer new insights into a particularly innovative field of implantology. After a successful kick-off event in 2015, and the successful annual congresses in Berlin (2016), Constance (2017), and Hamburg (2018), ISMI returns to its place of origin and invites participants once again to Constance in 2019. The two-day event starts on Friday with a Pre-Congress Symposium, seminars and the broadcast of a live operation via the Internet. The highlight of the first congress day will be the ISMI White Night, taking place directly after the day's programme (hedicke's Terracotta) and offering participants a relaxed atmosphere with wine and music to wind down the day. On Saturday, which will be dedicated to scientific lectures, a wide range of topics will be presented and discussed, covering almost all areas of metal-free implantology. The Scientific Director of the conference will be ISMI President, Dr Dominik Nischwitz.

ISMI was founded with the aim of promoting metal-free implantology as an innovative and particularly trend-setting field within implant dentistry. In this context, ISMI supports its members with training offers, as well as current tech and market information. In its public relations work, i.e. in specialist circles, as well as in patient communication, ISMI is also committed to a comprehensive establishment of metal-free implantological treatment concepts. ISMI members receive a 20 per cent discount on the congress fee.
