“First ever
Biological
Bulk Fill”

Pediatrics

Restorative

Endodontics

For vital pulp therapy, bulk-filling the cavity with Biodentine™ makes your procedure better, easier and faster:

- Pulp healing promotion: proven biocompatibility and bioactivity
- Reduced risk of failure: strong sealing properties
- Only one material to fill the cavity from the pulp to the top
- Similar mechanical behavior as natural dentin: ideal for bulk filling

The final enamel restoration will be placed within 6 months.
