

**DVT MIT HOCHQUALITATIVER BILDGEBUNG BEI GERINGSTER STRAHLENBELASTUNG
CBCT WITH SUPERIOR IMAGING QUALITY AT THE LOWEST POSSIBLE RADIATION LEVELS**

■ Kaum eine andere Firma ist so spezialisiert auf die dreidimensionale Röntgendiagnostik wie das seit über 15 Jahren am Markt aktive Hightech-Unternehmen PreXion aus Japan. Deswegen neues DVT-System PreXion3D EXPLORER besticht durch ein klares und ultrapräzises Bild bei geringstmöglicher Strahlenbelastung und einfachster Bedienung – und das zu einem wirtschaftlich attraktiven Preis.

Bei vielen DVT-Bildgebungssystemen heutzutage geht eine gute Bildqualität meist mit hoher Strahlenbelastung einher. Der für den europäischen Markt entwickelte PreXion3D EXPLORER bietet mit einem 0,3 mm Focal Spot und Voxel-Größen von 0,07 mm eine in diesem Bereich einzigartige Kombination aus höchstmöglicher Bildqualität bei geringstmöglicher Strahlenbelastung. Das neue PreXion-DVT ermöglicht einen akkuraten 360-Grad-Rundumblick von 512 bis 1.024 Aufnahmen. Der PreXion3D EXPLORER verfügt neben der 3D-Analysefunktion über einen „True“- und einen „Reconstructed“-Panoramamodus bei Bildausschnittgrößen (FOV) von 50 x 50, 150 x 78 und 150 x 160 mm. Zusätzlich besticht das Gerät durch einfache Bedienbarkeit, umfangreiche Planungsprogramme und Bildgebungssoftware über alle zahnmedizinischen Indikationsbereiche hinweg.

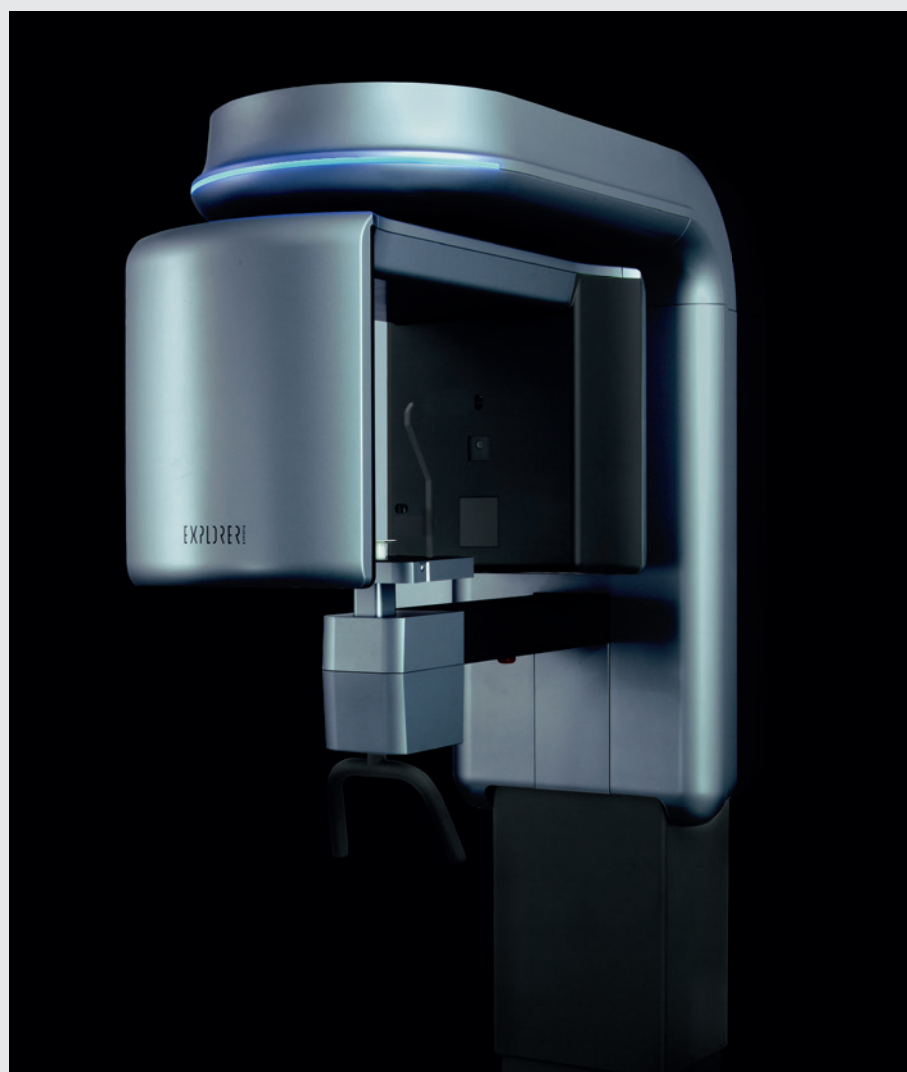

Die Weltpremiere des DVT-Systems PreXion3D EXPLORER findet vom 12. bis 16. März auf der IDS in Halle 2.2, Stand B081, statt. Exklusive Beratungstermine können bereits jetzt unter info@prexion-eu.de oder über die Homepage vereinbart werden. Oder kommen Sie einfach vorbei. ◀

■ The Japanese high-tech company PreXion, which has been active on the world market for more than 15 years, is specialised in three-dimensional diagnostic radiography like no other. Their new CBCT system PreXion3D EXPLORER stands out with a crystal clear, ultra-precise image and the lowest possible radiation exposure – at an attractive price point.

Looking at most of today's imaging solutions, a higher image quality usually goes along with higher radiation levels. The PreXion3D EXPLORER, especially developed for the European market, features a unique combination of superior imaging quality owing to its 0.3mm focal spot and voxel sizes of 0.07mm at the lowest possible radiation exposure levels in the industry. The new PreXion CBCT scanner allows for accurate 360-degree rotation with 512 to 1,024 projected views. Apart from the 3-D analysis mode, the PreXion3D EXPLORER features a "True" and a "Reconstructed" panoramic scan mode with field of view (FOV) sizes of 50 x 50, 150 x 78 and 150 x 160mm. In addition, the system convinces with its easy operability and features a comprehensive imaging software, as well as planning programs covering the entire range of dental indications.

From 12 to 16 March 2019, the PreXion3D EXPLORER will celebrate its world premiere at IDS in Cologne, Hall 2.2, Booth B081. Individual appointments can now be arranged online via info@prexion-eu.de and on the PreXion website. Or just come along. ◀

HURRICAINE®
Topical Anesthetic
20% Benzocaine Oral Anesthetic
ORIGINAL WILD CHERRY FLAVOR

Available in 1 fl. oz. bottles of liquid, 1 oz. bottles of gel and individually wrapped unit dose Snap -n- Go™ Swabs

20% Benzocaine for fast, temporary relief of occasional minor irritation and pain associated with:

- Sore mouth and throat
- Canker sores
- Minor dental procedures
- Minor injury of the mouth and gums
- Minor irritation of the mouth and gums caused by dentures or orthodontic appliances

EFFECTIVE

- Trusted by dental professionals for over 40 years
- Eliminates pain and discomfort

FAST-ACTING

- Relief within 30 seconds

SAFE

- Virtually no systemic absorption
- Available over the counter

HURRIVIEW®
Plaque Indicating Snap -n- Go™ Swabs

HurriView® and HurriView II® highlight where improved oral hygiene is needed

- HurriView highlights plaque in reddish-pink
- HurriView II highlights old plaque in blue and new plaque in reddish-pink
- Helps you show patients where they have plaque build-up & helps motivate them to improve their oral hygiene routines
- Individually wrapped
- In-office evaluation or dispense for home use
- Available in boxes of 72
- No messy rinses or tablets!

HURRIVIEW II®
Two-Tone Plaque Indicating Snap -n- Go™ Swabs

HURRISEAL®
DENTIN DESENSITIZER

FAST-ACTING

Chairside results

TREATS SENSITIVITY

When used for cervical sensitivity, HurriSeal® will last for 6 to 9 months

PREVENTS SENSITIVITY

When applied under restorations, HurriSeal lasts for the lifetime of the restoration

EASY TO USE

No mixing or light-curing

SOFT TISSUE FRIENDLY

Gentle to soft tissue and does not cause gingival irritation when used as directed

INTERESTED IN BECOMING A DISTRIBUTOR?

Beutlich® Pharmaceuticals, LLC is currently looking for distributors worldwide. If interested, please contact Mr. Jason Dominick, International Sales: TEL: +1-386-225-9322, Email: jdominick@beutlich.com
HurriCaine®, HurriView, HurriView II and HurriSeal are registered trademarks of Beutlich Pharmaceuticals, LLC. Snap -n- Go is a trademark of Beutlich Pharmaceuticals, LLC.
