

ITI World Symposium 2010

30 Years of Leadership and Credibility

The International Team for Implantology (ITI), a leading academic organization dedicated to the promotion of evidence-based research and education in the field of implant dentistry, is holding the 11th ITI World Symposium from April 15 to 17, 2010 in Geneva, Switzerland. At the same time, the organization, which was founded in 1980, is celebrating its 30th anniversary. Since the first ITI World Symposium in 1998, the meeting has developed into one of the most prestigious implant dentistry events worldwide. Under the heading "30 years of leadership and credibility", a total of 104 experts from 25 countries will present on current themes and developments in the field. The following main areas will be explored at both a theoretical and practical level over the Symposium's three days:

- _ New clinical methods for diagnosis and treatment planning
- _ New and proven treatment procedures
- _ Complications in implant dentistry or dealing with reality

There will be simultaneous translation available for all the presentations in the main sessions from English into German, French, Italian, Spanish, Portuguese, Japanese, Korean, Mandarin Chinese, Russian, Turkish and Farsi. For the first time, the ITI World Symposium is complementing its main sessions with two full-day pre-Symposium courses on 14 April as well as an industry exhibition. The attractive and historic city of Geneva at the heart of Europe is the ideal location for the event. The city's excellent infrastructure in combination with the Palexpo congress center offers both exhibitors and participants excellent conditions.

About the ITI

The International Team for Implantology (ITI) unites professionals around the world from every field of implant dentistry and related tissue regeneration. As an independent academic association, it actively promotes networking and exchange among its membership. ITI Fellows and Members, who now number more than 7,000 in total, regularly share their knowledge and expertise from research and clinical practice at meetings, courses and congresses with the objective of continuously improving treatment methods and outcomes to the benefit of their patients. The ITI is active in three principal areas: research, development and education. In 30 years, the ITI has built a reputation for scientific rigor combined with concern for the welfare of patients. The organization focuses on the development of well documented treatment guidelines backed by extensive clinical testing and the compilation of long-term results. The ITI funds research as well as Scholarships for young clinicians, organizes congresses and continuing-education events and also publishes reference books such as the ITI Treatment Guide series.
