

WE HAVE LEARNED TO THINK IN CERAMICS

USER COURSE (2 DAYS)

Ceramic Implants and Biological Dentistry – „The Swiss Biohealth Concept” with Dr. Ulrich Volz

CERAMICS ARE EASIER – BUT DIFFERENT

Today we are able to place more than 85% of SDS implants immediately (immediate implantation and immediate restoration with long-term temporary restorations). This requires a special protocol and the corresponding training. In this 2-day course, we will provide you the perfect introduction to ceramic implantology and explain the main differences from titanium implants.

Benefit from the experience of more than 20,000 personally placed ceramic implants from the SDS creator and head of the SWISS BIOHEALTH CLINIC, Dr. Ulrich Volz.
