

# ONLINE COURSE with Dr. Ulrich Volz

## CERAMIC IMPLANTS AND BIOLOGICAL DENTISTRY

Ceramics is easier – but different. Today we are able to set more than 85% of SDS implants immediately (immediate implantation and immediate restoration with long-lasting temporary restorations). This requires a special protocol and the corresponding training. In this online-course, we will provide you the perfect introduction to the biological dentistry and ceramic implantology and explain the main differences from titanium implants.

We have learned to think in ceramics. You too can profit from the expertise of SDS company owner and director of SWISS BIOHEALTH CLINIC, Dr. Ulrich Volz. Special treatment protocols have been developed from our 20 years of experience and the 20,000 ceramic implants which have been set to date. No matter whether it is the surgical ALL-IN-ONE concept or the SWISS BIOHEALTH CONCEPT that is redefining biological dentistry – all treatment steps have been carefully developed by users for users and are being put to use and optimized further on a daily basis at SWISS BIOHEALTH CLINIC.

## Learning Contents

- Introduction to biological dentistry
- Treatment sequences and algorithms according to biological-immunological criteria
- The SWISS BIOHEALTH CONCEPT
- Thinking in ceramics: the special properties of zirconium oxide
- Product overview: which implants in which situation?
- Biological Implant forms and prosthetics on SDS implants
- The SCC short-cut and all-in-one concepts acc. to Dr. Volz: The Holy Grail of implantology
- Before / after documentation, incl. patient testimonials
- 53 Chapters / 680 minutes

The Online course is in english and gives you access to the learning content optimized for e-learning that you can watch through as often as you want. You can stop the course at any time and continue watching it at a later time or rewind it. There is no time limit.
