Tissue Level Implants with Zirconia Collar

Digital workflow at
your fingertips

Zirconia crown made by Index
One milling machine

Aesthetic gingival area

Zirconia collar

Gingival integration
& Osseointegration

Bone area

Pure Titanium body

Unique, like your smile

The Z1® implants are medical devices intended for placement in the mouth, in case of partial or total tooth loss, by qualified healthcare professionals. These medical devices are regulated health products which, in accordance with this regulation, bear the CE marking. These dental implants are manufactured in France by Sudimplant SAS, owner of the Z1® trademark. For any information, please contact your dentist.
