

SWISS BIOHEALTH WEEK

Deepen your knowledge of Biological Dentistry and become a High Performer within one week

SWISS BIOHEALTH WEEK

The SWISS BIOHEALTH WEEK is built on each other level by level, so that you will become an absolute professional in this field within a few days. We have invited various experts who will train you in fascinating topics such as the use of neural therapy, specific preoperative nutritional advice for patients, the histopathology and diagnosis of cavitations on the CT scan, the first steps to becoming a biological dentist and what a focussed mindset can contribute. The last two days, Dr. Ulrich Volz will educate participants on the topic of longevity in a mostly hands-on workshop. Dr. Volz has been working on this for over 25 years and advises top international CEOs to improve their performance.

Date	19. - 24.04.2021
