The C-Line

Compress®

Implant

Available in 8/ 9/ 11 and 13 mm length
with 4.0/ 4.5/ 5.0/ 5.5 and 6.0 mm Ø

*Outstanding
primary stability!*

*Beveled shoulder for
preservation of bone and
Soft tissue*

*Plateau designed thread
for maximum primary
stability in soft bone*

*Microbacterial
Seal +
micromoment free
Implant-Prosthetics-
Connection*

*Slightly conical,
slender implant body for
maximum clearance between
the thread
and body for formation of
blood coagulum*

*Spiral
progressive +
compressive thread
for easy insertion
in soft bone*

*Implant design allows the use of
reduced diameter Flnal drills, according
to the bone quality*
