

EuroPerio10

Congress programme with over 130 top speakers

David Herrera and Phoebus Madianos are looking forward to the EuroPerio10 taking place in June.

The tenth edition of EuroPerio returns in 2022 after having been postponed from last year because of the Covid-19 pandemic. Organised by the European Federation of Periodontology (EFP), EuroPerio10 will take place on 15–18 June in Copenhagen, Denmark. It features a top-level scientific programme packed with sessions covering all the latest trends and topics for oral healthcare professionals, with 135 well-known speakers from over

30 countries in the main programme. The scientific programme features a wide variety of innovative formats, including live mucogingival and bone-regeneration surgeries, interactive sessions, so-called nightmare sessions (worst-case scenarios), video sessions, debates, interviews, symposia, and more. Considerable attention will be also given to the EFP’s S3-level clinical guidelines on the treatment of periodontitis—the newest guideline, on stage IV periodontitis, will be presented at the congress.

“The scientific programme addresses the interests of every member of the dental community and provides them with an updated snapshot of what perio is today,” explains David Herrera, scientific chair of EuroPerio10. “We have a great faculty, complete and diverse, addressing the main challenges of our profession with the most engaging session formats. So, we are proud to have prepared an exciting congress up to the task of bringing dental pro-

professionals up to date in terms of knowledge, skills, trends and solutions, but also in terms of personal interaction and networking with colleagues,” says Phoebus Madianos, chair of EuroPerio10. Registration for EuroPerio10 is possible at the EFP website and has been open to all professionals since August last year.

EAO Congress 2022 in Geneva

Uniting nations through innovations

The European Association for Osseointegration is pleased to announce details of its 29th congress, which will take place in Geneva from 29 September to 1 October with a digital programme for those who cannot attend in person. Geneva is home to many international organisations including the United Nations, the World Health Organisation and the Red Cross. Reflecting their goals of global collaboration, the theme of the EAO congress will be uniting nations through innovations. It will focus on the role of new technology in disrupting the way we communicate, work and learn. The programme will feature renowned speakers who will share their knowledge on the application of digital technologies across all aspects of implant dentistry. Sessions will compare current digital techniques with conventional techniques and will provide clinically relevant take-home recommendations. As well as

the daily live programme, the digital evening event will feature additional content, available to a global online audience. Anyone attending in person will be able to participate in both parts of the programme, experiencing two educational events at the same time. The congress is being held in partnership with the Swiss Society of Oral Implantology (SGI), the Swiss Society of Periodontology (SSP), the Swiss Society for Oral Surgery and Stomatology (SSOS) and the Swiss Society of Reconstructive Dentistry (SSRD). Geneva 2022 will be a unique opportunity to learn from the best. We hope that you can join us—either in person or virtually—for what will be a ground-breaking programme focused on the evolving role of technology in implant dentistry.

ISMI

INT. SOCIETY OF METAL FREE IMPLANTOLOGY

The innovative specialist society for modern metal-free implantology

Become a member now!

Benefits

Effective public relations

Benefit from a strong community that elevates the marketing of your practice through effective public relations strategies.

Personal online member profile

ISMI provides a personal profile of all active members on their website—free of charge. In addition, the ISMI patient platform provides important information for patients and features a search tool with which patients can find their perfect dentist.

Discount on congress fees

Come and join us! Attend the Annual Meeting of ISMI in Berlin on 24 and 25 June 2022 and benefit from first-rate continuing education. ISMI members receive a special discount on the participation fee.

Online archive for specialists

Get exclusive access to ISMI's extensive online archive. Discuss all relevant questions regarding metal-free implantology with experts and colleagues from around the world and enjoy free access to the online archive where you will find informative training videos and clinical case reports.

Newsletter

The ISMI newsletter keeps you up to date with the latest scientific trends, products, and events on a regular basis. It also features user reports as well as a wide range of information and tips on the subject of metal-free implantology.

Specialist magazine

As a member of ISMI, your membership fee includes a subscription of the independently published English language magazine *ceramic implants—international magazine of ceramic implant technology*. Published twice a year, the magazine offers specialist articles and event reports as well as industry- and science-related news from the international world of metal-free implantology. In addition, *ceramic implants* provides information about manufacturers and their latest products.
