

33rd International Expert Symposium on regenerative procedures in dentistry

Surgical and prosthetic complications

For the 33rd time, Prof. Joachim E. Zöller will organise his Expert Symposium on regenerative procedures in dentistry on Fuerteventura, Canary Islands, Spain. From 25 October to 1 November 2024, the Robinson Club Esquinzo Playa will be the venue for the symposium on surgical and prosthetic complications.

Learn from your mistakes! This ancient wisdom also applies to oral implantology. The review of surgical and prosthetic complications prompted the speakers to examine the affected treatment cases in minute detail, promoting intensive discussions in an intimate setting. "You don't need to experience all the negative situations yourself to avoid future mistakes; the available knowledge can help practitioners effectively handle upcoming challenges", said Prof. Zöller.

More than 40 speakers will explore the topic of complications in detail and offer many practical suggestions to the expected 300 delegates under the southern sun at the Robinson Club Esquinzo Playa, Fuerteventura. The following is an extract from the conference programme. (Workshops are not listed. All speakers are based in Germany unless otherwise indicated.)

33rd Expert Symposium: “Surgical and prosthetic complications”

25 October to 1 November 2024, Robinson Club Esquinzo Playa, Fuerteventura, Spain

Preliminary programme	
Early complications in soft- and hard-tissue surgery: From causes to solutions Prof. Peer Kämmerer, Mainz	Alternative treatment options with custom implants after odonto- genic/iatrogenic maxillary sinusitis and maximum jaw atrophy Dr Matthias Zirk and Agnes Zirk, Cologne
Complications in guided implant surgery Prof. Jörg Neugebauer, Reichling	Update on AWB two-piece bone-level ceramic implants Dr Jochen Mellinghoff, Ulm
Long-term experience from 20 years of implantology: Learning together from mistakes Dr Ralf Masur, Bad Wörishofen	Biological solutions in dentistry Dr Kianusch Yazdani, Münster
The xHya factor for permanent optimisation Dr Alexander Müller-Busch, Ingolstadt	The role of the dentist in the early detection of facial skin tumours Dr Sebastian Schiel, Augsburg
Biological complications: Causes and prevention Dr Lars Börner, Berlin	Occlusion on teeth and implants: what do we know and what do we believe? Prof. Florian Beuer, Berlin
Mistakes, failures and pure bad luck: Challenges in oral implantology Dr Martin Gollner, Bayreuth	Subcrestal implant placement—a ten-year follow-up Dr Volker Knorr, Eislingen/Fils
How likely is the loss of multiple implants? The cluster phenomenon Dr Rebecca Rosen, Vienna, Austria	Teach on the beach: A short course in functional diagnostics for implantologists Dr Christian Könecke, Bremen
Is there a reliable way to diagnose preclinical peri-implantitis? What are the therapeutic implications? Prof. Ralf Rößler, Luxembourg, Luxembourg	A gift from God, a public duty or a market commodity? The changing face of health in the course of time Prof. Axel Karenberg, Cologne
Implant loss and clinical and radiological outcomes after surgical treatment of peri-implantitis Dr Alex Solderer, Zurich, Switzerland	Resilient cities Henriette Reker, Lord Mayor of Cologne
Laser surgery, soft laser, antimicrobial photodynamic therapy and hyaluronic acid: Strategies for the treatment and prevention of peri-implantitis and surgical complications Dr Sigurd Hafner, Munich	Supplementary offer Update course in radiation protection (expertise and proof of knowledge) Dr Friedhelm Weber, Hamm and Jochen Völkening, Stemwede
Treatment of peri-implantitis: New frontiers Dr Lucrezia Paternó Holtzman, Rome, Italy	
When and why is a single implant in the edentulous jaw better than no implant? Prof. Matthias Kern, Kiel	
Dental printing ... an underestimated revolution in dentistry? Dr Gerhard Werling, Landau	
Can particulate dentin as a biological bone substitute prevent complications in oral implantology? Dr Jochen Weitz, Augsburg	
Implant-prosthetic first aid Dr Wolfgang Bücking, Wangen im Allgäu	
Update on immediate implant placement in the aesthetic zone What do we know? How far can/should we go? Dr Peter Randelzhofer, Munich	
Complications and solutions in the context of sinus floor elevation Prof. Fred Bergmann, Viernheim
